PROFILE

A seasoned IT professional with a track record of spearheading system optimization and software deployment. Experienced in collaborating with diverse teams, leveraging hands-on technical skills and strategic implementation to drive seamless operations. Proficient in full-stack web development, user authentication, and dynamic data visualization. Eager to contribute technical expertise to innovative software development and UX-focused remote/hybrid roles.

WORK EXPERIENCE

System Support Specialist

Middle Georgia State University, Cochran GA | 10/2021 - Present

- Architect and deploy innovative scripting solutions using PowerShell to automate tasks, optimizing system efficiency and paving the way for scalable software deployment.
- Efficiently collaborate with faculty and staff, providing crucial technology support, troubleshooting, and computer maintenance across campus, demonstrating adaptability in diverse software environments.
- Spearhead the design and implementation of audio-visual setups for high-profile campus events, ensuring seamless UI/UX experience and system performance.
- Actively engage in server management and maintenance, leveraging deep insights into Windows 10 and Microsoft platforms to ensure uninterrupted services.
- Dexterously utilize Remote Desktop capabilities and remote software deployment techniques to enhance operational efficiencies, reduce downtimes, and support university's digital initiatives.

IT Field Technician

Brooksource, Macon GA | 06/2021 - 07/2021 (Contract)

- Collaborated with application teams to design and conduct intricate device mapping and script testing, ensuring precise application installations and software performance.
- Interfaced with clinical, business, and IT staff, providing robust technical support and fostering inter-departmental synergy for seamless software integrations.
- Contributed to project management strategies, reinforcing field service initiatives and aiding in the streamlining of application development and deployment processes.

Shift Supervisor

Starbucks, Macon GA | 12/2018 - 10/2021

PROJECTS

Water Intake Tracking Platform | 05/2023

- Architected a full-stack web application leveraging HTML, CSS, JavaScript, PHP, and SQL; enhanced user experience by offering customizable hydration goals and diverse unit measurements.
- Engineered user authentication mechanisms, streamlining account creation and login; integrated dynamic data visualization, presenting weekly user hydration data via interactive graphs.
